**Subject:** Mike Horse Mine

I am completely opposed to Section 35 as the repository site for the Mike Horse Mine tailings due to the horrific impact it will have on the private property owners in close proximity and the threat to the Blackfoot river and it's tributaries.

The unethical and illegal way the people behind this plan have quietly been plotting a site without informing the public until the very end and thinking it was of no consequence is deplorable.

Did you really think this would go unnoticed? Well, guess what- It didn't, and we are outraged! Shame on you for thinking you can put a toxic waste dump across the street from my parent's (Mike and Barb Grimes) home not to mention all their surrounding neighbors. Put yourself in their shoes, would you want this dump across the street from your dream home that you worked your entire life to build? Not to mention the long term effects you would be causing to the watershed. Really? This is the best you can do? Try again and how about this time rather than getting politics involved, you actually make an environmentally and economically sound decision without destroying people's lives in the process. How does that sound?
